BioP2P Spotlight Series

August Spotlight: BioP2P Directory

[Visit the BioP2P Directory](#)

The August Spotlight Series highlighted the BioP2P Directory and the free resources available from the *BioProcess To Product* (BioP2P) Network to support the United States biomanufacturing community. If you weren't able to watch Matt Gardner and Missy Fox as they explored the website and discussed upcoming additional features, you can access the recorded video below.

BioP2P Spotlight Series

Eric Steen
Co-Founder and CEO, Lygos Inc.

SEPTEMBER SPOTLIGHT:
Wednesday, September 13th at 10am Pacific

The September Spotlight Series will host Eric Steen, Co-Founder and CEO of Lygos, Inc. and highlight *Soltellus* as an innovative product produced through biomanufacturing.

When: Wed., September 13th @ 10am (Pacific)
Webinar available through LinkedIn.
Click the link below to sign up.

Welcome BioResource

BioP2P Network presents at the

International to the BioP2P Directory

[The BioP2P Directory](#) has more than 70 facilities in the United States listed in the free and searchable directory. All verified sites have toll biomanufacturing capacity.

This month we welcomed **BioResource International, Inc.** located in RTP, North Carolina. BioResource International offers 220-Liters of microbial fermentation capacity and provides expertise in the development, optimization, and scale-up processes. BRI has DSP capabilities to support the primary recovery, purification and characterization of microbial products servicing the Biotech / Agtech / Food and Beverage industries.

If you have a facility with capacity for contract manufacturing, click the link below to be added to the Directory.

ABPDU Expo

On August 7th, BioP2P Network presented at the day-long virtual expo hosted by Advanced Biofuels and Bioproducts Process Development Unit (ABPDU) at Lawrence Berkeley National Laboratory.

The Expo focused on scale-up and biomanufacturing, specifically aiming to support ABPDU's current and potential collaborators in scaling-up to commercial volume. Opening remarks were given by Dr. Deepti Tanjore, ABPDU Director and member of the BioP2P Network Scientific Advisory Board. More than 30 organizations presented and represented innovators helping advance precision fermentation, and companies working to develop innovative products for the bioeconomy. A complete list of presenters can be viewed [here](#).

BioP2P Talent Initiatives

The BioP2P Network recognizes a robust talent pool is essential for growing the biomanufacturing community in the United States.

Visit the [BioP2P Directory](#) to locate training programs in the US developing bioprocessing technicians. The [BioP2P Career Center](#) is your resource for posting jobs and connecting to your next new hire.

ABOUT US:

The **BioProcess to Product Network** provides free resources to support the biomanufacturing community in the United States. The BioP2P Network is a project of the [California Biomanufacturing Center](#) and with support from Schmidt Futures, a philanthropic initiative of Eric and Wendy Schmidt. Visit our [website](#) to meet the Scientific Advisory Board members who have contributed to this resource and follow us on social media.

BioP2P Network By the Numbers:

71

Number of U.S. contract biomanufacturing facilities on the BioP2P Directory.

5

Number of Feedstocks mapped on the BioP2P Directory.

98

Number of job postings on the Career Center with bioprocessing in the job description.
